Level 2 SVQ

**Core Skills Mapping Analysis
(at SCQF level 4)**

August 2009

Overview

This document contains the outcome of a Core Skills mapping analysis in relation to the Level 2 SVQs which are contained within Lantra's Agriculture Modern Apprenticeship Framework.

This Modern Apprenticeship Framework was recently submitted to the Modern Apprenticeship Group (MAG) for approval. A condition of approval was that each of the awards contained within the Modern Apprenticeship Framework (and specific award routes wherever necessary) should be mapped against the Core Skills at an appropriate level to confirm that those Core Skills were embedded within.

The mapping analysis was carried out for the five recently revised Core Skills at SCQF level 4 only. These were:

- Communication
- Working With Others
- Problem solving
- Numeracy
- Information Technology

This report shows all of the units within the award structures. Only the mandatory units have been included in this mapping as these are the only ones that **all** learners will be completing.

Outcome

This mapping analysis shows that the following core skills at SCQF level 2 are embedded within the level 2 SVQ contained within the Agriculture Modern Apprenticeship Framework.

- Communication
- Working with others
- Problem solving

Information technology and Numeracy are not embedded as these aren't fully represented by any of the mandatory units within the pathways.
