

Current and Future Skills Demand

The Regional Skills Assessments (RSAs) are a single, agreed evidence base on which to base future investment in skills. The infographic below is designed to support the Argyll and Bute Rural Growth Deal Summary report, using Oxford Economics forecasts² over the period 2018-2028 to show current and future economic contribution as well as current and future demand for skills.

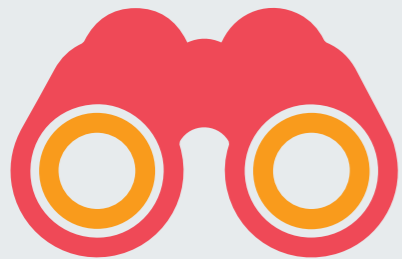

The Economy

Gross Value Added (GVA)¹ in 2018

Total regional GVA is:
£1,828m

1%
of total Scottish output

Forecast² annual growth (2018-2028)³:

Argyll and Bute: 1.0%
Scotland: 1.6%
United Kingdom: 1.9%

Productivity (GVA per job) in 2018

Regional productivity is:
£38,700

Compared to national productivity of:
£47,300

Forecast annual growth (2018-2028)

Argyll and Bute: 1.3%
Scotland: 1.3%
United Kingdom: 1.4%

Current Demand for Skills (2018)

Total Employment⁴ in 2018

47,200 jobs

Total employment between 2008 and 2018:

down by 2% or 800 jobs

Compared to a national increase of 2%

Sectoral Employment

Top 3 employing sectors in 2018:

Public admin. & defence
(7,300 jobs)

Accommodation & food services
(5,900 jobs)

Human health & social work
(5,900 jobs)

Employment by Occupation (people)

This is what the occupational structure⁵ looks like in 2018:

38%
Higher level occupations

36%
Mid-level occupations

26%
Lower level occupations

* As with all forecasts, certain caveats need to be applied. They are based on what we know now and include past and present trends projected into the future. Their value is in identifying likely directions of travel rather than predicting exact figures. It is recommended therefore that users examine trends over time rather than focusing on changes in individual years. Finally, the more disaggregated they become, especially at smaller geographical units, the less reliable they are likely to be.

¹ GVA is the measure of the value of goods and services produced within the economy.
² Forecasts by Oxford Economics (unless

otherwise stated).
³ Data for 2019 to 2028 used as 2018 is based on the change between 2017-18. Please see RSAs and Technical

Note for more details.
⁴ Measured by total number of jobs.
⁵ 'Higher level occupations' are defined as Managers, directors &

senior officials, Professional occupations, and Associate professional & technical occupations; 'Mid level occupations' defined

as Administrative & secretarial occupations, Skilled trades occupations, Caring, leisure and other service occupations; and 'Lower level

occupations' defined as Sales & customer service occupations, Process, plant & machine operatives, Elementary occupations.

Current and Future Skills Demand

The Regional Skills Assessments (RSAs) are a single, agreed evidence base on which to base future investment in skills. The infographic below is designed to support the Argyll and Bute Rural Growth Deal Summary report, using Oxford Economics forecasts⁸ over the period 2018-2028 to show current and future economic contribution as well as current and future demand for skills.

Future Supply

Population 2016-2028⁶

Total population between 2016-2028:

down by 4% or 3,700 people

Forecast change:

Argyll and Bute: -4%

Scotland: 4%

United Kingdom: 6%

The working age population (16-64) between 2016-2028:

down by 12% or 6,400 people

Forecast change:

Argyll and Bute: -12%

Scotland: -1%

United Kingdom: 8%

Job Openings (2018-2028)

Between 2018-2028 there will be a:

Total requirement for 8,800 people

Expansion demand:⁷

Replacement demand

-800 people

9,600 people

This is what actual job openings within the total employment structure look like over the next 10 years:

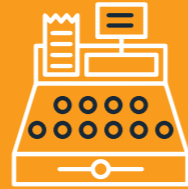

34%
Higher level occupations

30%
Mid-level occupations

35%
Lower level occupations

Future Demand for Skills (2018-2028)

Total Employment 2018-2028⁸

down by 3% or 1,400 jobs

Forecast average annual change:

Argyll and Bute: -0.3%

Scotland: 0.3%

United Kingdom: 0.4%

Top 3 employing sectors in 2028 are forecast to be:

Public admin. & defence (6,700 jobs)

Accommodation & food services (5,800 jobs)

Human health & social work (5,700 jobs)

Between 2018-2028

The largest employment growth is forecast in:

Admin & support services (7%)

Professional, scientific & technical (5%)

Construction (4%)

The largest employment decreases are forecast in:

Mining & quarrying (-26%)

Manufacturing (-15%)

Financial & insurance activities (-10%)

⁶ Source: National Records of Scotland.
⁷ i.e. the number of jobs across the region is forecast to decrease over the period due to contraction of the economy. Expansion demand is the measure of an increase/decrease in jobs, as a result of economic growth or contraction; replacement demand is the

number of job openings generated through labour market churn (i.e. those who retire, move away, or change jobs). N.B. Some figures may not sum due to rounding.

⁸ Throughout this section, figures for 2018 - 2028 use 2018 to 2028 data as per Oxford Economics

calculations. Please see RSAs and Technical Note for more details.
