up by 1% or 2,200 jobs

Compared to a Scottish increase of 1%

**Skills Shortages and Gaps**

The percentage of skills shortage vacancies and skills gaps in the Fife region are:

- **Skills Shortage Vacancies**
  - Fife: 13%
  - Scotland: 24%
  - Decreased by 9ppt from 2015

- **Skills Gaps**
  - Fife: 3.2%
  - Scotland: 5.0%
  - Decreased by 4.3ppt from 2015

*As with all forecasts, certain caveats need to be applied. They are based on what we know now and include past and present trends projected into the future. Their value is in identifying likely directions of travel rather than predicting exact figures. It is recommended therefore that users examine trends over time rather than focusing on changes in individual years. Finally, the more disaggregated they become, especially at smaller geographical units, the less reliable they are likely to be.

1 GVA is the measure of the value of goods and services produced within the economy.
2 Forecasts by Oxford Economics (unless otherwise stated).
3 Measured by total number of jobs.
4 Higher level occupations defined as Managers, directors & senior officials, Professional occupations, and Associate professional & technical occupations; Mid level occupations: defined as Administrative & secretarial occupations, Skilled trades occupations, Caring, leisure and other service occupations; and lower level occupations: defined as Sales & customer service occupations, Process, plant & machine operatives, Elementary occupations. Data shown is workplace based.
5 Source: Employer Skills Survey 2017. 6 Base: All establishments with vacancies (only 2017 shown). Skill shortage vacancies as a proportion of all vacancies. This may be due to a lack of skills, qualifications or experience amongst applicants.
6 Base: All establishments (only 2017 shown). Skills gaps: the proportion of the workforce lacking full proficiency.

- Professional, scientific & technical (12%)
- Arts, entertainment & recreation (11%)

The largest employment decreases are forecast in:

- Mining & quarrying (-28%)
- Electricity, gas, steam and air conditioning (-17%)
- Manufacturing (-15%)

Source: National Records of Scotland.

Expansion demand is the measure of an increase/decrease in jobs, as a result of economic growth or contraction; replacement demand is the number of job openings generated through labour market churn (i.e. those who retire, move away, or change jobs). N.B. Figures are rounded to the nearest 100 and as a result totals may not equal the sum of the constituent parts.
