

Regional Skills Assessments (RSAs) are a single, agreed evidence base created to inform future investment in skills. This infographic is for Scottish Borders, and supplements the region's RSA Summary report. It uses Oxford Economics forecasts* for the 2019-2029 period to show current and future economic contribution, as well as current and future demand for skills.

The Economy

Gross Value Added (GVA)¹ in 2019

Total regional GVA is: **£1,928m** **1%** of total Scottish output

Forecast annual growth (2019-2029):²

Scottish Borders: **1.6%**
Scotland: **1.7%**
United Kingdom: **2.0%**

Productivity (GVA per job) in 2019

Regional productivity is: **£37,900** Scottish productivity is: **£50,400**

Forecast annual growth (2019-2029)

Scottish Borders: **1.4%**
Scotland: **1.4%**
United Kingdom: **1.5%**

Current Demand for Skills

Total Employment in 2019³

50,900 jobs

From 2009-2019, Total Employment:

down by 1% or 500 jobs
Compared to a **Scottish increase of 1%**

Current Demand for Skills

Sectoral Employment

Top 3 employing sectors in 2019:

Wholesale & retail
(8,300 jobs)

Human health & social work
(8,200 jobs)

Manufacturing
(5,300 jobs)

The percentage of skills shortage vacancies and skills gaps in the Scottish Borders region are⁵:

Skills Shortage Vacancies⁶

Scottish Borders: **23%**
-27 ppt decrease from 2015

Compared to **Scotland: 24%**

Skills Gaps⁷

Scottish Borders: **5.0%**
1.5 ppt increase from 2015

Compared to **Scotland: 5.0%**

* As with all forecasts, certain caveats need to be applied. They are based on what we know now and include past and present trends projected into the future. Their value is in identifying likely directions of travel rather than predicting exact figures. It is recommended therefore that users examine trends over time rather than focusing on changes in individual years. Finally, the more disaggregated they become, especially at smaller geographical units, the less reliable they are likely to be.

¹ GVA is the measure of the value of goods and services produced within the economy.

² Forecasts by Oxford Economics (unless otherwise stated).

³ Measured by total number

of jobs.

⁴ 'Higher level occupations' are defined as Managers, directors & senior officials, Professional occupations, and Associate professional & technical occupations; 'Mid

level occupations' defined as Administrative & secretarial occupations, Skilled trades occupations, Caring, leisure and other service occupations; and 'Lower level occupations' defined as Sales & customer

service occupations, Process, plant & machine operatives, Elementary occupations. Data shown is workplace based.

⁵ Source: Employer Skills Survey, 2017

⁶ Base: All establishments with

vacancies (only 2017 shown). Skill-shortage vacancies as a proportion of all vacancies. This may be due to a lack of skills, qualifications or experience amongst applicants.

⁷ Base: All establishments (only 2017 shown). Skills gaps: the proportion of the workforce lacking full proficiency.
