 Compared to Scotland: 23.6%

Skills Gaps⁷

Rural areas: 5.7%
 ↗ 1.0 ppt increase from 2015
 Compared to Scotland: 5.0%

* As with all forecasts, certain caveats need to be applied. They are based on what we know now and include past and present trends projected into the future. Their value is in identifying likely directions of travel rather than predicting exact figures. It is recommended therefore that users examine trends over time rather than focusing on changes in individual years. Finally, the more disaggregated they become, especially at smaller geographical units, the less reliable they are likely to be.

¹ GVA is the measure of the value of goods and services produced within the economy.
² Forecasts by Oxford Economics (unless otherwise stated).

³ Measured by total number of jobs.
⁴ 'Higher level occupations' are defined as Managers, directors & senior officials, Professional occupations,

and Associate professional & technical occupations; 'Mid level occupations' defined as Administrative & secretarial occupations, Skilled trades occupations, Caring, leisure

and other service occupations; and 'Lower level occupations' defined as Sales & customer service occupations, Process, plant & machine operatives, Elementary occupations. Data

shown is workplace based.
⁵ Source: Employer Skills Survey, 2017. As data is only available at a regional level, we have used figures for 'Highlands and Islands' and 'South

of Scotland' as a proxy for rural areas.
⁶ Base: All establishments with vacancies (only 2017 shown)
⁷ Base: All establishments

steam and air
conditioning
(-10%)

⁸ Source: National Records of Scotland.

⁹ Expansion demand is the measure of an increase/decrease in jobs, as a result of economic growth or contraction; replacement demand is the number of job openings generated through labour market churn (i.e. those who retire, move away, or change

jobs). N.B. Some figures may not sum due to rounding.
