2.1% in 2016

1.2%

Unemployed Not Seeking
1.0% in 2016

i

The annual participation measure takes account of each status from 1st April 2016 to 31st March 2017 for all 16-19 year olds. All statuses are combined to calculate the participation headline classification and the status grouping displayed.

¹ SDS is working with SG and HMRC to obtain more comprehensive data on those in employment. This should bring benefits in reducing the number of unconfirmed statuses.

(Percentages may not total due to rounding)

2017 Annual Participation Measure Report

Summary for Argyll & Bute Council

The third release of statistics on the participation of 16-19 year olds at a national and local authority level is the second year the annual participation measure reporting methodology has been used. The annual participation measure takes account of all statuses for individuals over the whole year (1st April 2016 – 31st March 2017) as opposed to focusing on an individual's status on a single day, as adopted by a snapshot methodology. For each of the individuals included within the annual measure cohort, the headline participation classification (participating, not participating and unconfirmed) is based on the headline classification with the highest number of days.

As agreed by Scottish Ministers, from 2017, the Annual Participation Measure will be adopted within the Scottish Government's National Performance Framework. It is replacing the school leaver destination follow up as the source of the indicator, "**increase the proportion of young people in learning, training or work**", published through Scotland Performs.

The full annual participation measure 2017 report and accompanying supplementary tables are available in the [participation measure statistics page](#) of the Skills Development Scotland website.

The summary below provides a comparison between the 2017 and 2016 local authority results along with the 2017 results for Scotland.
